

EXTEND USB 3/2/1 OVER CATX

INDUSTRY-FIRST USB 3, 2 AND 1 EXTENDER

Extend all your USB devices, regardless of the USB technology, with the ICU504A 4-port USB 3/2/1 Extender. It supports all USB 3.1 (Gen 1), 2.0, and 1.1 devices simultaneously. Furthermore, this unique solution is the only USB extender capable of USB 3.0 extension over CATx.

The ICU504A is ideal for use in meeting rooms and huddle spaces where there is a need to connect to conferencing cameras, docking stations, interactive white boards, touch screens, flash and hard drives, keyboards, mice, USB-to-video converters, audio devices and any other USB 3, 2 and 1 device. Furthermore, the extender also provides connectivity to medical imagery, access to remote storage systems and monitoring of security cameras.

EASY USB EXTENSION

Extend ALL your USB devices, at full bandwidth over a single CAT6A or CAT7 cable. Furthermore, the installation is true plug-and-play; no software drivers are required.

BACKWARD COMPATIBLE

Connect all USB 3.1 Gen 1 (5 Gbps), USB 2.0 and USB 1.1 device types simultaneously.

GREAT EXTENSION LENGTH

Get your USB connections where they need to go, up to 100 m over a single cable.

HYPER-FAST

Hyper-fast USB speeds – 10x faster than any other USB 2 extender on the market – enable you to save valuable time by making large or multiple file transfers significantly faster.

LEVERAGE EXISTING INFRASTRUCTURE

A 100/1000 Mbps Ethernet side channel lets you use your existing network infrastructure without having to run additional dedicated cable.

TYPICAL APPLICATION: MONITORING OF SURVEILLANCE CAMERAS
