Manage More Sources, Reduce Costs

1) IP Streams Improvement

- Significantly increases the number of source acquisitions from 25 to 80 per computer
- Enables existing hardware to manage more sources.

2) Video Management Systems (VMS) Integration

- Access all sources on a Milestone or Genetec VMS (requires Milestone or Genetec VMS software)
- Display and manage many sources with fewer Radian Flex licenses

3) Source Tab in the Control Panel

- Centralized source control via a new tab in the control panel
- Access and browse a list of all available sources
- Control sources via KVM
- Create new RTSP streams
- Open browser windows

Streamlined Control, Simplified User Experience

4) Auto Snap

- When content is dragged and moved it will SmartFrame to the surrounding snap-to grid automatically.
- See a preview before content snaps in place
- Makes it easier to move an object or multiple objects
- Quickly maximize available space on the wall canvas

5) Background Content Synchronization

- Minimizes disruptions resulting from a hardware failure

- Content on the failed PC will automatically be delivered to the replacement PC when the hardware becomes available.

6) Source Snapshot

- Capture a static image of an event for later examination

7) Wall Grids

- Define SmartFrame grids on a video wall's entire canvas
- Not limited by display bezels

Radian Flex LED Sync Provides Support and Improves Visual Performance for dvLED Displays

(Sold separately as product number VW-FLEX-SYNC. Requires Radian Flex Software Version 7.0.)

- Industry-exclusive dvLED video wall support that's ideal for borderless LED displays.
- State-of-the-art synchronization across multiple LED controllers
- Superior visual experience with smooth, tear-free motion across multiple video wall controllers
- Eliminates visual issues associated with latency

Note: To update Radian Flex software to version 7.0 and take advantage of the new upgrades and license, you must have an up-to-date Maintenance Agreement in place. The new add-on, Radian Flex LED Sync, must be purchased separately and is only available with Radian Flex software version 7.0.
